Welcome to Luke Supply !

The company "Luke Supply" a global player was founded in 1990 as a family company by Founder Mr. Matt. The business purpose was at first the contract manufacturing of Cleaning Tools. The range has been expanded rapidly to industrial grade for the Cleaning industry and household. We aim to offer our customers OEM, ODM, PL from the first material all the way to the finished product dispatched to our customers. Luke Supply's capabilities are versatile and synergistic, which allows the company to evolve to meet changing market needs, while also helping our customers capture new opportunities in dynamic industries

A large stocked warehouse of over 20,000 sf and 40+ containers inventory in our facilities at Mid of China and West Coast USA allows us maximum flexibility and fast distribution.

Our R&D, production lines, Consistent quality, large stock inventory, on-time delivery, competitive prices and remarkable after-sales service are Luke Supply's primary objectives. We are continually striving to upgrade our services and facilities to meet our goal of providing our customers value and satisfaction with products that assure total performance.

Microfiber	9.
Cleaning Accessories	11.
Handles	14.

We offers a wide variety of products to help you achieve your specific mopping needs efficiently. The following information could assist you in selecting the right mops for you.

YARNS

The variety of mops is large because certain yarns are designed for a specific task. It's important to understand that selecting the proper yarn will enable you to achieve maximum efficiency.

CUT-END STYLE

Cut-end mops are more economical at purchase. They tend to fray, lint and unravel. This will lead to increased mop replacement. Most cut end mops are non-laundryable and handwash only.

LOOP-END STYLE

The loop-end mop performs more efficiently by re-sisting tangles without linting and fray-ing. These mops stand up to heavy use. Sewn in tailband provides wide surface coverage without gaps. Some loop mops may be laundered with care.

Yarns	Advantage	Disadvantage	Applications
Blends	More color choices and less linting	Not good at picking debris	Industrial/Commercal
Cotton	Good absorption and water retention for economical choices	Break-in required	Household/Office
Microfiber	Highly durable for commerical use and heavy duty scrub	Static electricity Special care requirements	Industrial/Commercal Household
Rayon	Fast water absorption and release Dries fast and resistant of mildew	Poor durability	Industrial/Commercal Household
Synthetic	Fights bacteria, mold and mildew while providing superior strength	Stiffness and weak at delicate fabrics or intricate surfaces	Industrial/Commercal Household
